FAST KNOCKDOWN FOR CRAWLING & FLYING INSECTS

Oa2ki® is a novel polymer formulation combined within a water based delivery system. Oa2ki® gives rapid knockdown, having the added benefit of being insecticide free with no residual activity.

Oa2ki® is highly effective against ants, bed bugs, fleas, flies and small insects by physical means only - without the use of poisons.

Directions for use

Spray the product directly onto the insect pest to obtain complete coverage. Oa2ki® can be used both indoors and outdoors.

Ants

Spray directly onto ants and where trailing ants are visible.

Fleas

Oa2ki® can be sprayed directly onto pet bedding, do not spray directly onto animals.

Bed bugs & small insects

Product can be applied directly to the insects and to cracks and crevices where insects may hide.

Avoid spraying near highly polished wax surfaces. Do not spray directly onto animals, plants or foodstuff. Product may mark or darken absorbent surfaces. These marks should disappear within a few days but if in doubt, spray a small test area first.

Oa2ki® is a non biocidal product due to its physical mode of action and is exempt from EU Reg. 528/2012

Health & Safety Information

- Keep out of reach of children.
