

Brass Choke Gauge Key Ring Instructions

12 & 20 Gauge

Simply push the gauge in the muzzle of the gun and when the segment fits the bore perfectly.

Read of the gauge the amount of choke of each barrel.

This high quality shooting accessory is essential when buying a fixed choke pre-owned gun,

As the choke stamps may not correspond to the amount of choke in the bore I.E sometimes choke is bored out by a gun smith and they do not always re-stamp the new choke on the barrels

As for multi choke guns the choke stamps can wear of off etc. and some people get confused as to ascertain what choke tube is what, simple to do with this gauge.

The Following ballistic chart will be of great interest to any shooter

DIAMETER OF SPREAD

Being the diameter in inches converted by the bulk of the charge of a gun at various ranges for ALL calibres.

Boring of Gun	Range In Yards						
	10	15	20	25	30	35	40
True Cyl	20"	26"	32"	38"	44"	51"	58"
Imp Cyl	15"	20"	26"	32"	38"	44"	51"
¼ Choke	13"	18"	23"	29"	35"	41"	48"
½ Choke	12"	16"	21"	26"	32"	38"	45"
¾ choke	10"	14"	18"	23"	29"	35"	42"
Full Choke	9"	12"	16"	21"	27"	33"	40"

STEEL SHOT WARNING

It is highly dangerous to use more than ½ choke when using steel shot
