

CASE STUDY: **PIGEON SPIKES**

"BirdOff Spikes never disappoint. The PestFix team are great to deal with and our orders always arrive on time and quickly."

- Joe Trotman, Managing Director of Commercial Bird Control Ltd.

THE CHALLENGE

A university student accommodation site was facing serious health and safety concerns due to persistent pigeon activity. The presence of birds was leading to:

- Slip hazards from droppings, creating risks for students and staff.
- Structural damage to the cladding caused by acidic droppings.
- Vehicle damage in the car park, resulting in complaints from students and parents.

A long-term, effective bird control solution was needed to eliminate these issues and prevent costly maintenance.

THE SOLUTION

After a thorough site survey, the Commercial Bird Control team determined that, due to the bird species present, a combination of Bird Netting in the car park and BirdOff Bird Spikes on exposed steel cladding would be the most effective solution. The bird spike installation utilised the BirdOff Standard Pigeon Spikes, alongside Stix All Extreme Power Adhesive.

THE RESULT

Since the installation of Bird Netting and BirdOff Bird Spikes, the site has experienced a complete elimination of pigeon-related issues. The solution has remained effective with no maintenance call-backs or further interventions needed.
